

Number : HW003
 Subject : Programming EPROMS 2704/8 2716
 Date : 1979, January 12th

It is possible to program the EPROM types 2704/8 and 2716 using the GPIO board on the TWIN.

The GPIO board has to be modified as described in the appendix of this note. The functions of the modified board can be seen on the block diagram Fig. 1 below.

All additions to the board are shown within dotted lines.
